

COVID-19 Vaccine Fast Facts

Vaccination is an important way to protect yourself and loved ones

Many COVID-19 vaccines are available. All of them are effective, safe, and FREE.

Vaccines prepare your body's natural defenses to fight the virus.

Vaccines may cause sore muscles, tiredness, or fever for a few days. These side effects do NOT mean you are sick or have COVID-19

After you are fully vaccinated, there is still a small chance you may get the virus. Test for COVID-19 if you feel symptoms.

Not everyone will get vaccinated, so it's important to protect yourself and others.
